EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Mehrle, Attorney for Applicant(s) on 07/18/2005.

The application has been amended as follows:

Tile: METHODS AND SYSTEMS FOR RENDERING AN ELECTRONIC PAGE METHODS
FOR RENDERING FOOTNOTES

REASONS FOR ALLOWANCE

Claims 1-20 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's arguments, and the amendment filed 06/03/2005. Examiner finds the claimed invention is patentably distinct from the prior art of record.

The prior art of record, Chirokas et al. US Patent No. 5,111,397 filed 12/11/1989, Cuan et al. US Patent No. 4,503,515 filed 05/17/1982 and Ferrel et al. US Patent No. 5,860,073 filed 07/17/1995, disclosed a method and system for assemble all body and footnote texts into respective pages, wherein the Footnote pause or stop one step of processing and to go back to a

Art Unit: 2176

previous step, such as reverse from the order of last good line into first of new text, which set forth in the previous final rejection mailed on 08/12/2004.

The prior art of record, Chirokas, Cuan and Ferrel fail to anticipate or render Applicant's particular computer-implemented system and associated method for inverting the non footnote body data to second location when the footnote body data are inserted into the media, wherein the footnote body data temporarily occupies portions of the first location, and wherein the first location represents a top portion of the media and the second location represents a bottom portion of the media; and restoring the non footnote body data into the first location with the footnote body data occupying the second location.

In addition the Examiner interprets the claimed "inverting", as a type of flipping, which is supported by specification drawing in Fig. 4b, item 390 and Fig. 4c, item 410, and in Applicants' specification page 11, lines 1-10.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quoc A. Tran whose telephone number is (571) 272-4103. The examiner can normally be reached on Monday through Friday from 11AM to 7PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Herndon R. Heather can be reached on (571) -272-4136. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
